

## Invisible Service Technicians, LLC | Affordable Monitoring Solutions

Invisible Service Technicians, LLC | P: 513-248-0900 | F: 513-248-2470 | 502 TechCenter Drive, Ste. B | Milford, OH | 45150 | www.istmonitor.com

### How would you like to offer your customers:

- The ability to affordably monitor their critical mechanical and electrical equipment
- Lower their utility bills
- Reduce equipment repair costs
- Extend the longevity of their equipment
- Give them peace of mind regarding the critical needs of their business

### Applications the IST Monitor is currently servicing:

- Servers/Data Centers/Computer Rooms
- Packaged & Split HVAC Systems
- Walk-In Coolers
- Storage Facilities
- MRI & PETCT Scanners
- Generators
- Wine Cellars
- Boilers
- Mobile Specialty Vehicles
- Oil Rig Control Rooms

### What if...

What if you could provide your customers with a premium service that had previously only been offered in large corporate markets?

What if you could maximize the value of one of their most expensive purchases?

What if you could offer them an affordable, fully-automated monitoring system capable of monitoring nearly any piece of mechanical or electrical equipment that will notify them when their equipment needs attention?

### Predict and Prevent...

Introducing the IST Monitor: a remote, web-based monitoring and diagnostic system. This innovative system enables your customers to receive instantaneous notification when their equipment performance is deteriorating. This feature allows your customer to timely have the equipment checked and fixed before major failure occurs.

### You're in Control...

The ingenuity of the IST Monitor is in its web-based software interface. Designed with the customer in mind, it's easy to use, readily customizable, flexible and accessible from anywhere. Customized settings allow your customers to configure the IST Monitor to suit their individual requirements.

- Adjustable time delays and alarm dependencies fully prevent false alarms.
- Automated temperature calculations increase the capacity to enable remote diagnosis.
- In addition to reading temperatures, we can monitor digital contact closures, humidity, water level, UV light strength, filter airflow, electrical current and power outage.

The Monitor's adaptability, coupled with the 24/7/365 monitoring that IST provides, allows your customer to take complete control.
